FRIDAY EVENING, MARCH 25.

The New South.

To the editor of the Alexandria Gazette: The subjoined article-an editorial-in a late number of the Chicago Interior, the best and most widely circulated religious paper published north of the Potomac, will, I think, be gratifying to the readers of your

OESERVER.

raper. OBSERVER.

"The autocracy of labor organizations in this country, and the fact that a laboring man can get four times as much in money for his labor, and nearly twice as much in tood and whisky for his 'mark' as can be had in Germany and Scandinavia—these powerful attractions are stirring the peasantry as never before—so that the labor parket stready begins to groan. There are antry as never before—so that the labor narket already begins to groan. There are thousands of men in Chicago out of employ ment, and their numbers will increase continually. But these unemployed men are not permitted to compete with the employed. They are a subject class held in subjection by violence. Saying nothing of the right or wrong of this state of things, it is a strained condition, in which the tension consantly increases. The labor organizations stand between two classes who are trying to come together, and who will come together. to come together, and who will come together as soon as they are able to overcome and defy the interposing resistance. This means recial war. As our cities are falling more and more under the rule of arrant demagogues, the contending parties will be left to fight it out, medieval fashion. In anticipation of this the new factories which are in process of construction are built with the idea of a fortification in view.

They will seen develop into arread content. built with the idea of a fortification in view. They will soon develop into armed castles. If the legal protection which society agrees to afford is withdrawn, then every man must provide for his own safety and for that of his property. The small force of Pinkerton rereseary troops is growing year by year in numbers, drill and efficiency, and are coming grore into depend as lew. by year in numbers, drift and entertry, and are coming more into demand, as lawful protection is windrawn by demagogue mayors and governors of states. Volunteers for this army are ton to every one that can be accepted—and the offers come from unemployed labor. The volunteers have grievances to avenge as well as wages to earn and this acceptals for the fact that they are -and this accounts for the fact that they are swift to use their weapons when permitted swift to use their weapons when permitted to do so. We thus see the trend of both sides of this controversy. A consequence not very remote, is the condition of things in the 'New South.' The forward movement of the late slave states in manufactures call bridge is attention. of all kinds is attracting general attention and causing surprise. Not long since it was a common complaint that northern capital was not safe in the south. Now, it is not so safe anywhere else. Should presis not so safe anywhere else. Should present causes continue, the south will become the preponderating manufacturing region of America, because factories will be safe there from organized brigandage. The south is flourishing because it affords better government and more security to property than can be had in the manufacturing cities of the north the north.

## A Terrible Fire.

What a thrill of terror passes over us when we read the record of some fearful devastation by fire, and yet it is a fact that thousands are daily being consumed by the inward fire of fever, caused by consumption of the lungs, which could be subdued by Dr. Pierce's "Golden Medical Discovery."
